

## Equipment Options

### **EZ STREAM Equipment Kit Option (Most Popular)**

To simplify the process of livestream setup, we have developed a kit with all of the components and cables you'll need to stream with a camera and laptop (if you need a camera or laptop, we can help with that too). Once you identify what equipment you are going to use, we will help you purchase or rent an EZ Stream Equipment Kit from our technical partners. This box will include all of the wires and adapters you'll need to connect your camera and sound to your laptop and stream your show. Our staff has put together a collection of tutorials and tech support to ensure a successful stream.

### **Mobile Option (Least Expensive)**

If you are doing a more personal, small cast performance or just don't have the budget to purchase equipment, you can use our Mobile Setup option. Today's mobile devices can be more powerful than older cameras and equipment. All you need is a good tripod and some creative positioning to stream your event. We will provide you with a road map to apps and connectors and step-by-step video tutorials. Our support staff will be at the ready to help with setup and troubleshooting.

### **Pro Advanced**

If you have the budget and experience to produce a more robust, multi-camera production, our system can handle that as well. Our professional platform offers the flexibility for customized video productions of all size and scope. We can work with your school's television department or even connect you with professional vendors to make your dream stream happen.

If you are experienced with streaming and have the required equipment, we will review your equipment with you to make sure everything is compatible and set up properly to work with our system.

No matter what equipment you decide to use, we'll be there for you. Our customer service team is ready to answer any questions you have.
