

Pricing

Price Per Stream

As you have come to expect from BookTix, we have structured our streaming platform to be professional grade and as cost effective as possible. For organizations using BookTix for both ticketing and streaming, our streaming service is free to your organization when our per stream fee of \$1.00 is passed on to your patrons.

How It Works

The cost to livestream an event with BookTix Live is based on the number of single use StreamPasses that are created. A StreamPass is the unique code that allows secure access to your livestream for each ticket holder. Your patrons receive their StreamPass via email and click a link to enter your virtual show in our browser player.

Bring Your Own Ticketing

Understanding that there are organizations that want to livestream with BookTix Live but have existing contracts or long term relationships with other ticketing vendors, we decided to offer BookTix Live as a standalone platform. You can upload your ticket buyers and BookTix Live will generate and distribute StreamPasses. Our stream fee is \$2.00 per StreamPass, which you can plan to include when pricing your tickets.
